Print index

Physical page numbers of Mechanistic_Interpretability_Complete_Anthology.pdf (page 1 = title page).
Print range = cover + original paper; type it into your print dialog. Text pages = original paper only.

NO.	PAPER	COVER	TEXT PAGES	PRINT RANGE	PAGES
A	**ORIENTATION**				section 15–144
01	● Interpretable Bases (essay)	17	18–24	**17–24**	8
02	○ Mechanistic?	25	26–44	**25–44**	20
03	● Open Problems in Mechanistic Interpretability	45	46–127	**45–127**	83
04	○ Attention Is All You Need *optional*	129	130–144	**129–144**	16
B	**FOUNDATIONS: VISION MODELS AND EARLY TRANSFORMERS**				section 145–578
05	○ Feature Visualization	147	148–169	**147–169**	23
06	○ Network Dissection	171	172–180	**171–180**	10
07	● Zoom In: An Introduction to Circuits	181	182–211	**181–211**	31
08	○ Curve Detectors	213	214–240	**213–240**	28
09	○ Multimodal Neurons	241	242–290	**241–290**	50
10	● Mathematical Framework for Transformer Circuits	291	292–354	**291–354**	64
11	● In-context Learning and Induction Heads	355	356–416	**355–416**	62
12	○ The Logit Lens	417	418–446	**417–446**	30
13	● Interpretability in the Wild (IOI circuit)	447	448–472	**447–472**	26
14	● Progress Measures for Grokking	473	474–508	**473–508**	36
15	○ The Clock and the Pizza	509	510–537	**509–537**	29
16	○ Emergent World Representations (Othello-GPT)	539	540–556	**539–556**	18
17	○ Othello-GPT Is Linear	557	558–578	**557–578**	22
C	**CAUSAL METHODS AND THEIR CRITICS**				section 579–997
18	● Locating and Editing Factual Associations (ROME)	581	582–616	**581–616**	36
19	○ Does Localization Inform Editing?	617	618–643	**617–643**	27
20	● Causal Scrubbing	645	646–668	**645–668**	24
21	○ Causal Abstractions of Neural Networks	669	670–695	**669–695**	27
22	○ Causal Abstraction: A Theoretical Foundation *optional*	697	698–760	**697–760**	64
23	○ Distributed Alignment Search (DAS)	761	762–789	**761–789**	29
24	○ Is This the Subspace You Are Looking For?	791	792–849	**791–849**	59
25	○ A Reply to the Interpretability Illusion	851	852–871	**851–871**	21
26	● Best Practices of Activation Patching	873	874–900	**873–900**	28
27	○ How to Use and Interpret Activation Patching	901	902–914	**901–914**	14
28	● Automated Circuit Discovery (ACDC)	915	916–950	**915–950**	36
29	○ The Hydra Effect	951	952–972	**951–972**	22
30	○ Probes with Control Tasks	973	974–984	**973–984**	12
31	○ Probing Classifiers	985	986–997	**985–997**	13
D	**WHAT IS A FEATURE?**				section 999–1387
32	○ Softmax Linear Units	1001	1002–1043	**1001–1043**	43
33	● Toy Models of Superposition	1045	1046–1107	**1045–1107**	63
34	○ Composition & Superposition	1109	1110–1117	**1109–1117**	9
35	○ Privileged Bases in the Residual Stream	1119	1120–1130	**1119–1130**	12
36	○ Feed-Forward Layers Are Key-Value Memories	1131	1132–1143	**1131–1143**	13

Bibliography and sources: pp. 3735–3750. Notes pages between papers are not part of any paper's range.

Section print ranges

A section range runs from its divider to the last page of its final paper (covers and notes pages included).
The second string prints only the papers (covers + text), skipping the divider and notes pages.

A Orientation — 15–144

Papers 01–04 · 130 pages · papers only (no divider or notes pages):

17-127,129-144

B Foundations: vision models and early transformers — 145–578

Papers 05–17 · 434 pages · papers only (no divider or notes pages):

147-169,171-211,213-537,539-578

C Causal methods and their critics — 579–997

Papers 18–31 · 419 pages · papers only (no divider or notes pages):

581-643,645-695,697-789,791-849,851-871,873-997

D What is a feature? — 999–1387

Papers 32–44 · 389 pages · papers only (no divider or notes pages):

1001-1043,1045-1107,1109-1117,1119-1143,1145-1185,1187-1263,1265-1289,1291-1313,1315-1347,1349-1357,1359-1387

E Dictionary learning at full strength — 1389–2028

Papers 45–54 · 640 pages · papers only (no divider or notes pages):

1391-1411,1413-1517,1519-1641,1643-1711,1713-2028

F The reckoning — 2029–2336

Papers 55–62 · 308 pages · papers only (no divider or notes pages):

2031-2135,2137-2239,2241-2251,2253-2295,2297-2336

G Competing programmes, 2025–26 — 2337–2850

Papers 63–71 · 514 pages · papers only (no divider or notes pages):

2339-2381,2383-2465,2467-2799,2801-2850

H Interpretability in alignment practice — 2851–3551

Papers 72–82 · 701 pages · papers only (no divider or notes pages):

2853-2909,2911-2943,2945-2985,2987-3015,3017-3055,3057-3153,3155-3173,3175-3265,3267-3551

I Is this worth doing? — 3553–3733

Papers 83–91 · 181 pages · papers only (no divider or notes pages):

3555-3595,3597-3621,3623-3633,3635-3675,3677-3683,3685-3711,3713-3733

Essential readings (P0)

34 readings · 1578 pages including covers

PRINT-DIALOG STRING FOR ALL P0 PAPERS

17-24,45-127,181-211,291-416,447-508,581-616,645-668,873-900,915-950,1045-1107,1265-1289,1315-1347,1391-1411,1413-1517,1519-1606,1643-1711,1713-1742,1777-2028,2031-2104,2253-2295,2297-2336,2339-2381,2383-2465,3057-3153,3155-3173,3597-3621,3677-3683,3685-3711
